Press Release – 24th April 2008

Bulmers

Bulmers Implement Turnstiles, Barriers & Emergency Headcounting

Bulmers have implemented TDS' turnstiles, car park barriers and Emergency Headcounting which integrate with the **CoreAccess** solution to manage site wide employee access control and meet health & safety obligations.

Bulmers is truly an Irish success story, having grown its share of the beer market from 2.8% to over 10% in less than 10 years, and the brand continues to grow. Bulmers Ltd. is the only Irish cider producer in Ireland and can boast being the fastest growing drinks brand in Ireland since the mid-90s. The Bulmers Pint Bottle is the biggest selling bottle of any beer in Ireland. And, as a result of this growth, per capita consumption of cider in Ireland is now the highest in the world.

The Kentaur Turnstiles were selected as Bulmers attach great importance to perimeter protection on their premises. The automatic full height turnstiles at all entrances ensures Bulmers can control and monitor movement of people onsite without disruption to activity whilst providing for the highest levels of health & safety.

TDS' automated barriers are designed for use in car parks, similar to Bulmers, where there is a high frequency of use. The mechanical design allows a fast, smooth and secure movement on and off-site.

Bulmers have selected the **CoreAccess Emergency Headcounting** functionality. In the event of an emergency or evacuation, people can 'swipe if safe' at a predetermined intelligent device in a safe area. A real-time 'missing list' is produced which is reduced as each person swipes at the designated safety points.

This contract further strengthens TDS Ltd's position as the leading provider of integrated Enterprise Wide Access Control solutions to leading organisations.
