## Press Release – 10<sup>th</sup> December 2007

### Institute of Technology Carlow

#### IT Carlow Select TDS for Flexi-Time Hardware

The Institute of Technology Carlow has selected TDS Ltd's **Kaba Benzing** Time & Attendance devices to integrate with their CoreHR Flexi-Time module.

At the Institute of Technology Carlow, every effort has been made to combine a stress-free location with top-level tuition and facilities that are the leading edge in a number of key disciplines both nationally and internationally. In the current academic year, the Institute has a student body of almost 4,000 and an academic staff of 200.

The Institute selected the **Kaba Benzing** B-Net 93 20 devices to integrate with the CoreHR Flexi-Time module. The proposed devices have graphic, transfective LCD display to show time and attendance information. There are 5 function keys which are configurable to the Institute's unique requirements i.e. official absence, balance query, flexi time balance, etc. The proposed **Kaba** hardware can be used with the Institute's existing Mifare staff cards.

The roll out of the Flexi-Time module has provided IT Carlow employees the ability to view hours, leave, balances, etc at the clocking terminal and retain control of their working hours. This employee empowerment process significantly reduces the administrative burden on the HR and Payroll departments.

The proposed Flexi Time solution will integrate fully with the **CoreAccess**, **CoreBadge**, **CorePay** and **CoreTime** solutions currently in use in The Institute of Technology Carlow.
