Press Release – 24th November, 2006

Dublin City University

DCU Select TDS' Student Attendance Solution

Dublin City University have selected TDS' Student Attendance Monitoring Solution to ensure compliance with EU regulations.

Dublin City University (DCU) is one of Ireland's leading educational institutes. DCU is a major research institution, which has gained worldwide recognition for the work of many of its key researchers and research teams. Four of its major research centres and institutes have been awarded very significant capital funding by the state and by private investors to enable them to provide leadership at a global level.

The TDS solution facilitates both active (on-line update of data) and passive (downloading of data) data capture methods to facilitate the complex requirements of tracking student attendance at both fixed and non-fixed locations. DCU students will swipe at fixed Kaba readers (within the Lecture Hall), or a Mobile Device will be passed around by the Lecturer during a lecture to capture attendance. This 'mobile' information will then be downloaded by the lecturer or system administrator to the database. A random head count 'class sheet' can be produced by the system containing information such as student photo, name, number, bar code and signature line.

DCU also selected TDS Ltd's ITS Student Interface, which is used to transfer relevant Student Data to the **CoreCampus** Badge Making system.

This contract further strengthens TDS Ltd's position as a leading provider of solutions to the educational sector.
