DHL Secure Data Centre with Iris Scan Recognition

DHL have selected TDS Ltd's Iris Scan Solution to cater for their extensive Access Control and Security requirements at the company's Data Centre in Dublin.

DHL is the world's leading express and logistics company with global expertise in solutions, express, air and ocean freight and overland transport combining worldwide coverage with an in depth understanding of local markets. DHL employs more than 500 staff in Ireland carrying more than 1 billion shipments per year and serves 4.2 million customers in 220 countries and territories.

Iris recognition simply involves taking a picture of the iris, which is used solely for authentication. This stable, reliable and non-evasive solution employs iris recognition technology to provide DHL with accurate identity authentication without PIN numbers, passwords or cards. Enrollment takes less than 2 minutes and authentication takes less than 2 seconds. The LG Iris recognition technology together with [CoreAccess](#) provides a seamless and unobtrusive solution to DHL's security and safety needs combined with maximum ease of use and aesthetic appeal.

This contract further strengthens TDS' position as a leading provider of Access Control solutions to leading multinationals and demonstrates our commitment to providing the latest technology solutions.
