Press Release – 1st April 2008

Dairygold

Dairygold Selects TDS Ltd's CoreAccess Solution

Dairygold have selected **CoreAccess** to cater for the internal and external Access Control requirements of their cheese manufacturing facility located in Mitchelstown.

Dairygold Co-Operative Society Limited is Ireland's largest farmer owned business. Its businesses include Dairygold Food Ingredients (DFI) and Agri Trading. DFI's Mitchelstown site delivers innovative and cost effective solutions to the needs of its cheese clients in the Industrial, Retail and Food Service sectors through a number of key customer focused resources. DFI is an efficient low cost processor of the Group's c.850 million litre milk pool - the country's second largest.

A key requirement for DFI was to select a site wide solution to cater for current and future Access Control, Security and Health & Safety requirements. **CoreAccess** controls internal doors through the implementation of the fully integrated **Kaba** terminals. DFI selected the Legic card technology and design and print their ID badges onsite for employees, visitors & contractors through the **CoreBadge** Module.

DFI also implemented TDS' **CoreAccess Automatic Barriers** to manage access and egress from the plant. The proposed car park barriers uses the new legic ID badge to enable authorised users enter and exit the site through the barriers. The automatic barriers operate in real-time thus DFI have a real-time headcount of onsite personnel.

DFI have implemented **TDS' Weighbridge Identification** module which enables DFI to identify the driver and view the driver details during the weighbridge process to ensure the delivery details are in order before the driver exits the site.

The proposed **CoreAccess** solution is fully integrated with the CoreHR solution which is currently implemented in DFI.

This contract further strengthens TDS Ltd's position as a premium provider of cutting edge solutions to leading organisations.
