Press Release – 17th August 2009

Donegal County Council

Donegal County Council Implement TDS' Time & Attendance Clocks

Donegal County Council have implemented TDS' B-Net 9320 Clocks to cater for their extensive Time & Attendance requirements.

Donegal County Council plays a proactive role in the development and economic growth of Donegal county. Over the last number of years the council has opened offices in Public Service Centres throughout the county, thus providing their extensive range of services to the more remote areas of Donegal.

A key feature for Donegal County Council was the ability to configure the **B-Net 93 20** Clocks to utilise the council's existing HID card technology, thus providing a single card approach for employees.

With its appealing design, combined with ease of use, the **B-Net 9320** is the ideal terminal for the council's start into time recording. The business absence functionality and In/Out keys were a specific requirement of the council.

The **B-Net 9320** Time & Attendance terminals are reliable and durable and integrate fully into the council's **CoreTime** solution. This fully automated **CoreTime** solution will significantly reduce processing time for the Council's HR department, maximise the efficiency of their workforce and control labour costs.

This contract further strengthens TDS Ltd's position as a premium provider of cutting edge solutions to public organisations.
