Press Release – 28th June 2006

Freshways – Kerry Foods

A Leader in the Global Food Industry Selects CoreAccess Solution

Freshways Foods part of the Kerry Group Organisation have selected TDS Ltd's Biometric CoreAccess Solution to cater for their extensive Access Control requirements in the company's Finglas facility.

Kerry Foods is a leading supplier of added-value food brands and customer branded products to major supermarket chains, convenience stores and independent retailers across Ireland, the UK and selected European markets. Kerry Foods has some 30 manufacturing facilities throughout Ireland and the UK, with an extensive distribution network in both regions. Included in it's portfolio of consumer branded products are over 20 high profile brands, many of which are category leaders in the chilled cabinet.

The proposed **CoreAccess** solution combines 'best in class' **CoreAccess** Enterprise Wide Security Management software with 'best of breed' Ingersoll Rand Biometric Hand Punch Readers. **CoreAccess** was selected for it's comprehensive functionality, seamless integration, web compliant and open systems standing.

Freshways selected the Hand Geometry System as it provides a fast resilient solution that can cater for the company's large employee numbers.

The Hand Punch verifies employees' identities in less than one second, based on the unique size and shape of their hands. For Freshways, the Hand Punch provides a quick return on investment by eliminating the cost associated with administering and managing employee identification cards.

TDS will provide Freshways with full implementation and on-going support services.

This contract further strengthens TDS Ltd's position as a leading provider of Access Control Solutions to global organisations.
