Press Release – 8th April 2009

HOVIONE

Hovione have selected TDS' **CoreAccess Enterprise Wide** solution to increase their overall security and to cater for internal and external Access Control requirements at their APIs Facility located in Loughbeg Co. Cork.

Founded in Portugal in 1959, Hovione is an international group dedicated to cGMP development and manufacturer of APIs, serving exclusively the pharmaceutical industry. Hovione bought Pfizer API's production plant this month, with Hovione providing Pfizer and other customers manufacturing services with the main focus being contract manufacturing.

A key feature for Hovione was to deploy a comprehensive Enterprise Wide Security Management System across their APIs Facility in Co. Cork. This solution was implemented to provide controlled and secure access to employees. The **CoreAccess** solution is equipped with fully integrated **Kaba** hardware devices providing an unobtrusive solution for Hovione's security and safety needs. The latest **CoreAccess** solution provides for the management of Hovione's Contractor, Visitor and Emergency Headcounting needs.

In addition, the selection of the **CoreSIP** (Safety Information Panel) module by Hovione, instantly ensures visitors of Hovione's commitment to maintaining the highest levels of Health & Safety possible and informs them of emergency procedures.

The **CoreBage** system utilises Legic Smartcard technology and provides Hovione with an onsite ID Badge Making system. This solution also caters for the printing of temporary employee, visitor and contractors cards onsite.

This contract further strengthens TDS Ltd's position as a premium provider of cutting edge solutions to leading pharmaceutical organisations.
