**Press Release – 30<sup>th</sup> November 2009**

## **Irish Blood Transfusion Service (IBTS)**

### **IBTS Select TDS' Mobile Time & Attendance Solution**

The Irish Blood Transfusion Service was established in 1965 and today supplies 71 hospitals in Ireland with blood and blood products, 365 days a year. The IBTS have eight centres around the Country with their headquarters based in Dublin. The mobile blood banks provided by the IBTS enable members of the public to easily access this service and give blood on a regular basis.

In September 2008 the IBTS implemented TDS' fixed clocking devices and ESS (Employee Self Service Kiosks) in 8 sites around the Country to cater for their comprehensive Time & Attendance requirements. Over the last few months TDS have worked closely with IBTS to roll out a mobile solution for data capture of staff members working on their mobile blood bank units. It is anticipated a total of 300 IBTS employees will use the handheld devices to clock out from their evening shifts.

The **TT-Net Mobile Solution** enables IBTS to capture Time & Attendance for all remote based employees. This data is then transferred automatically to **CoreTime** to record, analyse and report on, thus reducing processing time for the IBTS HR department.

The TDS solution utilises the robust **TT7000** handheld mobile devices which are designed for use in extreme working conditions. Features of the **TT7000** include; no unnecessary ports, protection against drop, dust and splash water therefore guaranteeing a long life time.

The mobile solution is fully integrated with the IBTS' existing Legic card technology thus providing a single card approach.

This contract further strengthens TDS Ltd's position as a premium provider of cutting edge solutions to leading organisations.
