Press Release – 8th September 2008

**Irish Blood Transfusion Service
(IBTS)**

IBTS Selects TDS Ltd's Time & Attendance and ESS Hardware

The IBTS have selected TDS' Kaba Hardware to cater for the extensive Time & Attendance and Employee Self Service requirements nationwide.

The Irish Blood Transfusion Service Board came into existence in 1965. The functions of the IBTS are set out in Statutory Instrument No 78 of 1965 and Statutory Instrument No 209 of 1998. The main function is to organise and administer a blood transfusion service including the processing or supply of blood derivatives or other blood products, and also including blood group and other tests in relation to specimens of blood received by the Board.

The IBTS have rolled out the Kaba Hardware to cater for Time & Attendance Clocks and Employee Self Service Kiosks in their 8 sites around the country. The B-Net 93 40 is the market leading terminal for all modern time management requirements. It combines high functionality, flexibility of use and appealing design. All standard features such as In, Out, Official Absence, Balance Query and special functions are covered by its five function keys with coloured icons.

The IBTS have also selected **Kaba ESS (Employee Self Service) Kiosks** which enables employees request future absences, enquire and maintain basic time management data and maintain personal details, thus reducing the administrative burden on the HR Department.

The proposed hardware solution is fully integrated with the IBTS' existing HID card technology thus providing a single card approach.

The **Kaba Clocks** are fully integrated with the CoreHR solution which has been implemented in the Irish Blood Transfusion Service.

This contract further strengthens TDS Ltd's position as a premium provider of cutting edge solutions to leading organisations.
