Press Release – 8th September 2010

ISS Facility Services

ISS Facility Services Select TDS' Wireless Biometric Time & Attendance Solution

ISS Facility Services selected TDS' Wireless Biometric Clocks to cater for their comprehensive Time & Attendance requirements.

ISS is an international blue-chip company and world leader in Integrated Facility Services. ISS entered the Irish marketplace in 1995 and offers a wide range of service solutions, from single services to fully Integrated Facility Services (IFS) that combine all of their customer's service and support requirements in one single solution. ISS' head office is located in Dublin and has regional offices based in Limerick, Cork, Galway, Drogheda, Tipperary, Waterford, and Letterkenny.

ISS selected the cutting edge **Kaba Benzing B-Net 93 20** Biometric Time & Attendance terminals to provide a quick and effective method for their Time & Attendance data capture. The **B-Net 9320** devices are being rolled out throughout Ireland. The key feature for ISS was no requirement to connect the clocks to a network point, the data is downloaded utilising GPRS which fully integrates to the CoreTime database located in the ISS offices in Citywest, Dublin.

The **B-Net 9320** Time & Attendance clocks with their appealing design and ease of use made these the ideal terminal for ISS' start into time recording. All standard features such as In, Out, Official Absence, Balance Query and Special Functions are covered by its five function keys with coloured icons. The Biometric option eliminates the possibility of buddy punching which can be a major cost for organisations. ISS Facility Services can expect an immediate return on their investment.

This contract further strengthens TDS Ltd's position as a premium provider of cutting edge solutions to leading organisations.
