Press Release –27th January 2009

Laois County Council

**Laois County Council Selects
TDS' CoreAccess Solution and
Time & Attendance System**

Laois County Council have selected TDS' Access Control, Time & Attendance and ID Card Bureau Services which is fully integrated into the CoreHR solution currently being deployed across all Council's.

Laois County Council was formed in 1898 and is responsible for the delivery of a wide range of services throughout the county. The Council provides and maintains the majority of the infrastructure in the county, with its activities directly impacting on the lives of those who work and/or live in the county.

The **CoreAccess** solution was implemented to provide controlled and secure access to employees. The **CoreAccess** solution is deployed with the fully integrated **Kaba** hardware devices providing an unobtrusive solution to all the Council's security and safety needs.

A key requirement for Laois County Council was the **Kaba B-Net 93 20** clocks for Time & Attendance. The Kaba clocks are robust and easy to use for employees to confirm clockings including flexitime and annual leave thus reducing the administration burden on the Council's HR Department.

Laois County Council have also selected TDS to provide Bureau Services for their ID Card Production. TDS in conjunction with Laois County Council will design, encode and print employee ID cards for use with the Access Control and Time & Attendance System. This will remove the overhead of on-site card production from Laois County Council.

This contract further strengthens TDS Ltd's position as a premium provider of cutting edge solutions to public organisations.
