Press Release – 3rd September 2007

Millipore Ireland BV

Millipore Implement TDS' CCTV System

Millipore Ireland have selected TDS' Honeywell CCTV Solution to compliment the company's recent Access Control project.

Millipore Ireland has emerged as a centre of excellence for the Bioscience manufacturing and Biotechnology sector. Located in the hub of the industry's activity in Cork since 1988, Millipore Ireland employs over 500 staff on a 38-acre site at Carrigtwohill. The plant manufactures plastic membrane filtration devices and plastic membrane films using technologies including membrane casting, plastic injection moulding and device assembly.

TDS' Honeywell CCTV solution provides Millipore with a state-of-the-art surveillance solution.

Millipore have selected digital recording which ensures:

- No quality loss in replay
- The images can be viewed remotely
- Recorded images can be instantly accessed by simply calling up a time and date on the keypad
- The system can be set to record on motion activation, this means that no disc space is wasted by recording still objects and only starts to record when motion is seen.

Millipore have selected the Orbiter Platinum Range which is the proven market leader in dome technology. The Orbiter range boasts the features and specifications to outperform anything else that has gone before it including superb low light colour performance, industry leading Scaleable Privacy Zone, built in option of Twisted Pair or In-Coax telemetry and the plug and play versatility.

TDS was involved in the specification, design, implementation and support of the roll-out. The CCTV system is fully integrated with Millipore's CoreAccess solution.

This contract further strengthens TDS Ltd's position as the leading system integration provider of Security Management solutions to leading organisations.
