Press Release –23rd July 2009

ONE51 Plc

ONE51 Plc Have Selected TDS' Biometric Solution for Time & Attendance

One51 have selected TDS' Time & Attendance clocks to cater for their comprehensive Time & Attendance requirements in Ireland and the UK.

One51 was established as part of a reconstruction of the Irish Agricultural Wholesale Society Limited. One51 has been organised into key divisions based primarily on the different management requirements of rapidly growing operational and investment activities including; Environmental Services, Infrastructure, Food and Renewable Energy.

One51 have selected the cutting edge **Kaba Benzing B-Net 93 20** Biometric Time & Attendance terminals to provide a quick and effective method for their Time & Attendance data capture. The **B-Net 9320** devices are being rolled out to 22 companies throughout Ireland and the UK. The key requirements for One51 was the elimination of buddy punching and the long term cost saving implications as there is no requirement for employees to use badges or fobs to clock in.

The B-Comm Java software extension selected by One51 enables superior control of the clocks and the sensitive information they contain, this software extension limits the data stored on one clock from being transferred or viewed by any of the other companies, which was a distinct requirement of One51.

This contract further strengthens TDS Ltd's position as a premium provider of cutting edge solutions to leading organisations.
