Press Release – 5th March 2008

Pauwels Trafo

Pauwels Trafo Selects TDS Ltd's Time & Attendance and ESS Hardware

Pauwels Trafo have selected TDS' **Kaba Hardware** to cater for the extensive **Time & Attendance and Employee Self Service** requirements of their manufacturing facility located in Cavan.

Pauwels Trafo Ireland is a manufacturer of oil-filled single phase distribution transformers. These are used mainly in the United Kingdom and Ireland, where some suburban and rural electricity distribution is by single-phase overhead lines to sites close to consumers. P.T.I. has the technology and specialised manufacturing plant for large-scale production of this type of transformer. The factory in Cavan produces single phase trafos from 15kVA upwards and with a primary voltage up to 36kV.

Pauwels Trafo selected the Kaba Hardware to cater for Time & Attendance Clocks and Employee Self Service Kiosks. With its appealing design, combined with ease of use, the B-Net 93 20 clock is the ideal terminal for time recording. All standard features such as In, Out, Official Absence, Balance Query and special functions are covered by its five function keys with coloured icons.

Pauwels Trafo have also selected **Kaba ESS (Employee Self Service) Kiosks** which enables employees request future absences, enquire and maintain basic time management data, view payslip and maintain personal details, thus reducing the administrative burden on the HR Department.

Pauwels Trafo have selected TDS' Bureau service for their Legic fobs as the proposed **Kaba Hardware** is utilising the latest Legic technology.

The **Kaba Clocks** are fully integrated with the CoreHR solution which has been implemented in Pauwels Trafo.

This contract further strengthens TDS Ltd's position as a premium provider of cutting edge solutions to leading organisations.
