Press Release – 1st May 2007

Pfizer Sterile Manufacturing Plant

Pfizer Dublin Goes Live With CoreAccess Pharma Edition

The Pfizer Sterile Manufacturing Plant in Dublin has gone live with the **CoreAccess** Pharmaceutical specific solution.

Based on a 17 acre site in Pottery Road Dun Laoighaire, the Pfizer Dublin Manufacturing facility has been in operation since 1970. Pharmaceutical production has increased from an original volume of 750,000 vials to 7.2 million vials in 2000. The site has steadily expanded with the Pharmaceutical Plant introducing new sterile products and the development of a 10,000sq ft sterile manufacturing facility.

The Plant is a global sourcing unit approved to supply product all over the world and faces the challenge of maintaining compliance in an increasingly complex regulatory environment. This can be particularly challenging in the sterile arena. As part of this effort the site has in excess of 1,000 Standard Operating Procedures (SOP's).

TDS' **CoreAccess** Pharma edition provides full compliance with FDA (21 CFR Part 11) requirements whilst ensuring the sites stringent health and safety requirements are fully met. Pre-set alarm conditions will automatically trigger a headcount report in the event of an emergency. People can 'swipe if safe' at a predetermined intelligent device in a safe area. Using this information **CoreAccess** uses mustering to produce a 'missing list'.

The **CoreAccess** Pharma Edition is currently being used by other Pfizer sites including their European Headquarters in Sandwich in Kent, Pfizer Little Island, Pfizer Loughbeg and Pfizer Ringaskiddy.

This deployment further strengthens TDS' position as a leading provider of tailored Access Control solutions to the Pharmaceutical sector. Other Pharmaceutical clients include Bausch & Lomb, Braun, Bristol Myers Squibb, DePuy, Eli Lilly, Janssen, Leo Laboratories, Proctor & Gamble, Roche and Wyeth.
