Press Release – 11th October 2007

Institute of Technology Tallaght

IT Tallaght Implements CoreCampus

The Institute of Technology Tallaght have selected the **CoreCampus** solution to cater for the expanding ID card production needs of the Institute.

Institute of Technology, Tallaght, Dublin (ITTD) is a third level College situated in South County Dublin. It was established under the aegis of Co. Dublin Vocational Educational Committee in September 1992. Since January 1993 the Institute has been an independent third level institution under the Regional Technical Institute's Act. There are now over 3,700 students enrolled, of whom, 1,562 are pursuing their studies on a part time basis.

IT Tallaght selected the **CoreBadge** solution to manage student and staff identification requirements whilst also providing for future security and external system provisions.

The **CoreBadge** solution enables IT Tallaght to print the student's photograph and individual details and provides a direct interface to the BANNER Student System. The selected Datacard SP75 printer includes a magstripe encoder, Mifare chip encoder, laminator and pre-design hologram.

A key requirement for IT Tallaght was to implement a mobile self contained "almost plug and play" station. During the busy registration period IT Tallaght utilise mobile stations with pre-configured PCs, ID card production devices and appropriate support.

The **CoreCampus** solution is also being used by Letterkenny IT, UCC, DIT, Dundalk IT, DCU, Carlow IT and Mater Dei Institute of Education.

This contract further strengthens TDS' position as the market leader in the educational sector offering a fully integrated Campus wide management solution.
